

## Environmental & Sustainability Policy

It is the policy Hendy Group to take action to minimise the environmental impact of its operations by:

1. Adopting repair and maintenance processes which are as environmentally sound as possible and comply with UK environmental standards.
2. Controlling any waste products produced by its work processes.
3. Seeking to reduce any environmental impact by controlled disposal of waste in accordance with UK legislation and its own environmental standards.
4. Wherever possible seek to recycle materials and waste products and continually look for ways to operate in a more environmentally and sustainable way.
5. Seeking to ensure that staffs are aware of the impact its operations have on the environment through ongoing training and information.
6. Providing information on environmental impact of its operations.
7. Appoint an environmental and sustainability officer to monitor and manage the impact of environmental issues on the business.
8. Waste is disposed off via registered carriers who transport the waste to registered sites. Records are maintained of the transfer of such waste.
9. Materials such as used oil, oil filters, scrap batteries, brake fluids, contaminated fuels, waste paint, metals etc are separated and sent for recycling or controlled disposal.
